

SPECIALISED CLEANING SERVICES FOR INFECTIOUS DISEASE DECONTAMINATION

Steamatic has been mitigating properties Australia-wide for over 30 years

With over 30 locations and 350 employees, we are the largest national restorer capable of handling small losses and complex and technical large losses.

Steamatic offers bio-hazard decontamination of homes or buildings that may have been impacted by an infectious disease such as Coronavirus (Covid-19), SARS (Severe Acute Respiratory Syndrome), Ebola and MRSA (Methicillin-resistant Staphylococcus Aureus) to name a few.

Depending on your needs, Steamatic can offer a preventative deep cleaning that goes above and beyond what traditional janitorial services companies offer, as well as a full bio-hazard

decontamination clean if a highly suspected or diagnosed case has visited your home or place of business. Adhering to the most stringent guidelines available worldwide, Steamatic follows the protocols, procedures and standards from the IICRC (Institute for Inspection, Cleaning and Restoration Certification) and the RIA (Restoration Industry Association).

Whether it is a high-rise building, place of worship, educational facility, shopping centre or private home, Steamatic will put together a comprehensive mitigation plan that suits your needs.

For more detailed information, call us today at 1300 783 262.

STEAMATIC HAS DECONTAMINATION SERVICES READY TO GO

The professional response is the only response. The Steamatic team is ready to deploy Australia wide. Our team is fully equipped to handle a bio-hazard decontamination safely and with all the necessary training and resources to ensure a safe outcome.
